

METS IGNITED IP MASTERCLASS

INTERNATIONAL PATENT FILING COSTS

The concept of National Phase Entry using the Patent Cooperation Treat (PCT) application is introduced in the Masterclass.

As an aid in estimating likely National Phase Entry costs and providing a cost effective mechanism to make these national applications, Denne Meyer developed the PCT Nationalization Portal. This Portal takes into account attorneys fee, official patent filing fees, and translation costs (where required)

An example of the use of this Portal follows, and the patent application used for the purpose of this example is:

PCT application no PCT/SE2019/050653

“Methods and Devices for Power Control in Mining Machines”

Applicant: Epiroc Rock Drills AB

The following example first shows some operational screenshots from the Portal, and then shows the actual estimated filing costs for two examples:

Example 1: 19 Countries USD29551

Example 2: 13 Countries USD22835

Please note the slight differences between the screenshots and the estimate printouts is due to these screenshots being generated at a different time to the actual estimate – currency differences etc.
